DISCRETIONARY PORTFOLIO MANAGEMENT FEES

Annual management fees¹

MEMANAGED	0.90% (incl. 21% VAT)
-----------	-----------------------

No transaction costs

At MeDirect, you do not pay any transaction fees on deposits (initial and additional payments) or withdrawals (total or partial) from your discretionary managed portfolio. Any taxes related to the capitalization funds under management will be held by MeDirect.

Taxes

The portfolios MeDirect manages consist of mutual funds that are subject to the standard Belgian tax regulations. MeDirect will do the necessary work and withhold all applicable taxes, so you don't have to take care of this.

Stock exchange tax (TOB)

There is no tax due when purchasing accumulating funds. When selling accumulating funds there is a one-time stock exchange tax. This tax represents 1.32% of the total sales price, but is limited to a maximum of EUR 4,000

Capital gain tax

Capital gain tax is only applicable on the sale of:

Funds purchased before 31 December 2017:

1. Capitalisation funds and trackers which invest 25% or more in fixed-income investments such as bonds;
2. Distribution funds and trackers which invest 25% or more in fixed-income investments, and do not pay out 100% of their interest income.

Funds purchased after 1 January 2018:

1. Capitalisation funds and trackers which invest 10% or more in fixed-income investments such as bonds;
2. Distribution funds and trackers which invest 10% or more in fixed-income investments, and do not pay out 100% of their interest income.

In both cases a withholding tax (capital gain tax) of 30% is deducted from the capital gains resulting from these fixed-income securities. The tax is calculated on the capital gains resulting from the fixed-income securities.

For example:

A capitalisation fund invests 40% in bonds and 60% in shares. The investor purchased the fund for EUR 100 and sells it for EUR 120.

The realised capital gain is EUR 20. As the fund invested 40% in bonds, the tax is only calculated over 40%. 40% of EUR 20 is EUR 8. The tax is 30%, which means EUR 2.4 is deducted and the investor will receive EUR 5.6 net. The fund invests 60% in shares; 60% of EUR 20 is EUR 12, for which no capital gains tax is calculated. The investor will receive EUR 120 – EUR 2.4 (capital gain tax) = EUR 117.6 on selling the fund.

¹ The management fee is calculated at the end of each quarter (31 March, 30 June, 30 September, and 31 December) based on the market value of the discretionary managed portfolio at each quarter end.

TRANSFERRING AN EXISTING PORTFOLIO? MEDIRECT WILL REIMBURSE TRANSFER FEES UP TO €500.

We do not charge any fee for transferring your existing portfolio to MeDirect. We will also reimburse any fees that your current broker may charge you for moving your securities, up to a maximum of €500 per customer. The amount in question totals €500 per customer throughout the entire customer relation period. (For example: you were already reimbursed for an amount of €250 earlier, then there's an amount of €250 that still can be introduced.).

The reimbursement is limited to maximum of €100 per transferred line and the value of the transferred line is at least €500 (or the equivalent of €500 if the security is quoted in a different currency).
